SUMMARY

Senior Mobile Developer with 7+ years of experience shipping 30+ production apps in Swift, SwiftUI, UIKit, and Flutter. Hands-on SwiftUI expertise: led a full UIKit-to-SwiftUI rewrite, built reusable design systems with Combine and Swift Concurrency, and architected apps using MVVM, MVI, and VIPER with async/await data flows. Currently delivering SalesApp at Azerconnect — a multi-operator sales platform serving Azerbaijan's largest telecom companies. Proven track record in modular codebases (Melos, Clean Architecture), reactive state management (Combine, Riverpod, Bloc), and CI/CD with fastlane and GitHub Actions. Known for proactively optimizing API structures and collaborating closely with cross-functional teams to deliver scalable solutions on schedule.

SKILLS

Languages Swift, Dart, Python

Apple Frameworks SwiftUI, UIKit, Combine, Swift Concurrency, async/await

iOS Libraries Moya, Kingfisher, SnapKit, SwiftLint

Architecture Clean Architecture, MVVM, MVI, VIPER, Coordinator, Modular (Melos)

Testing XCTest, XCUITest, flutter_test, TDD

Flutter Riverpod, Bloc, Dio, Hive, Melos, RxDart

Persistence Core Data, SwiftData, Realm, SQLite, Firebase, Hive

Backend & APIs RESTful Web Services, WebSocket, MQTT, Firebase, Django, Celery, RabbitMQ

CI/CD & Tooling GitHub Actions, fastlane, Codemagic, App Store Connect, Git, Jira, Figma

Spoken Languages Azerbaijani (Native), Turkish (Advanced – C1), English (Intermediate – B1)

EXPERIENCE

Azerconnect LLC — Senior Mobile Developer May 2023 – Present

- **SalesApp (iOS Native Rewrite)** — leading the ongoing SwiftUI rewrite of SalesApp as a native iOS application; architecting with MVVM, Combine, and Swift Concurrency (async/await) for a fully native experience.
- **CityNet** — led the full UIKit-to-SwiftUI rewrite of the internet provider's iOS app; established scalable MVVM architecture with Combine-driven data flows and Swift Concurrency (async/await).
- **CityNet** — built a reusable SwiftUI design system (custom components, theming, typography tokens); wrote unit and UI tests with XCTest and XCUITest, reducing crash rate.
- **SalesApp** — architected and shipped core UI and business logic for a multi-operator number-sales platform used by 3 major telecom brands; structured as a Melos monorepo with Riverpod and Clean Architecture.
- **InsideApp** — spearheaded development of an enterprise CRM serving 1,000+ employees, integrating biometric authentication, modular Riverpod architecture, and Firebase analytics.
- Proactively proposed API-structure improvements adopted by the backend team, accelerating feature delivery across sprints.

Kinobox.az — Mobile Developer Apr 2026 – Aug 2026

- Refactored and optimized a movie/TV streaming platform, improving load performance; implemented offline viewing and Chromecast screen-casting with Riverpod state management.
- Implemented native iOS platform channels for AVPlayer-based video playback and AirPlay integration.

Buylink — iOS Developer 2025

- Engineered a loyalty-program platform in SwiftUI with MVVM architecture, Combine publishers for reactive data binding, and structured navigation using UINavigationController and deep linking.
- Integrated QR-code scanning via AVFoundation, async/await networking layer, and dependency injection for testable, modular code.

Olink — Mobile Developer 2025

- Architected an IoT smart-home app controlling 10+ device types via MQTT protocol, with home-screen widgets and reactive Riverpod state management.

MyKids — Mobile Developer 2024 – 2025

- Delivered a parental-assistant app enabling parents to manage children's schedules and activities; architected with Melos monorepo and modular Flutter structure.

Aloe+ Pharmacy — Mobile Developer 2024

- Developed a pharmacy loyalty app with discount management, map-based locator displaying 50+ pharmacy locations, and Bloc-driven state management.

Global Management LLC — Mobile Developer Feb 2023 – May 2023

- **Tutaz.az** — implemented a local advertisement platform with integrated local payment gateways.
- **Oxu.az** — engineered a news app with custom video-player embedding and real-time content feeds.

Digitalks Creative Agency — Mobile Developer 2022 – 2023

- **LifeStep** — integrated Google Fit and Apple Health APIs into a charity step-challenge app with social login and reward tracking.
- **CBC Sport Azerbaijan** — shipped live TV streaming and real-time score updates for the CBC Sport channel app.
- **Neftchi Baku PFK** — launched the official club app with real-time match scores, league standings, and dynamic squad profiles.

Unik Taxi — Mobile Developer Jan 2022 – Aug 2022

- Developed a moto/auto taxi booking platform with Google Maps routing, real-time WebSocket communication, and integrated online payment.

Freelance — Mobile Developer 2019 – 2021

- **Dosty.co** — delivered a pet care and life-management app (Flutter, Firebase, REST API).
- **Biopet** — launched an e-commerce app for pet owners on App Store and Play Store in Ukraine and USA, with social login and online payment.

Azweb — Software Developer Oct 2017 – Aug 2019

- Architected and deployed 3 CRM systems for Denmark-based construction and workforce-planning companies (Python, Django, Celery, RabbitMQ, PostgreSQL).
- Built a Lombard accounting system with Telegram API integration for automated notifications.

E-box MMC / Tehsil Online — Web Developer Jul 2015 – Sep 2017

- Developed a government committee website and an online education platform (PHP, Yii2, MySQL).

EDUCATION

Baku State University Sep 2011 – Jul 2015

B.Sc. in Computer Science
